MILWAUKEE ROAD ROUNDHOUSE ROUNDUP

**Above:** The roundhouse at Deer Lodge, Mont., is shown on May 21, 1974. The roundhouse was expanded to 24 stalls and was demolished in July 1985. The roundhouse switcher, X3800, was home-built on a former F-M locomotive truck and was powered by an extension cord from the building.—R. MILTON CLARK

**Below:** The roundhouse at Avery, Idaho, is under construction in this scene from ca. 1908. The stalls were staggered so as to fit the roundhouse on a narrow section of land hemmed in by the St. Joe River (behind roundhouse).—ED LYNCH COLLECTION
